

OPERATIONS & MAINTENANCE

Protecting Your Solar Investment for Decades

Your solar PV system is not only helping to reduce your energy bills immediately, but also supporting the transition toward a low-carbon future. As a long-term asset expected to deliver value for the next 25+ years, your system's ongoing performance and health are what ensure you continue to see those benefits year after year.

Solar systems are mostly self-sufficient and largely out of sight, easy to overlook. Much of the financial return is realised automatically through lower energy bills or export payments. However, like any valuable asset, a certain level of routine attention is essential to maintain peak performance.

The Hidden Risk of Minor Faults

Even minor faults, while not always immediately noticeable, can reduce system output over time. These are smart systems designed to keep working even when part of them isn't performing optimally; however, reduced efficiency can directly impact your return on investment.

For example, you may expect your highest return on investment in summer and autumn, only to later discover that the system had been running at 50% capacity during those critical high-yield months.

Insurance & Regulatory Requirements

The solar industry is beginning to receive more attention from insurers and regulatory bodies. Many insurance providers are now requiring annual inspections, not necessarily to verify performance, but to ensure ongoing fire safety. While SolarEdge is a market leader in safety features, external factors can still influence system integrity.

YOUR ECO'S O&M SERVICE

Annual Audit

- Single Site: £750 + VAT per year
- Each additional site: £500 + VAT

Call out Charges

- Initial assessment: £750 + VAT (if not a Your Eco installed system)
- Remedial works: £500 per day
- Materials: cost + 30%
- Major works: costed post assessment

What's Included?

Annual Site Audit

- Comprehensive professional inspection of your solar PV system
- Detailed report of findings, alerts, and recommendations
- Visual inspection of panels and mounting systems (accessible areas)
- Drone inspection where physical access is not feasible
- Electrical system assessment and safety checks
- Performance analysis and system health evaluation

YOUR ECO

Automatic Monitoring Alerts

- Email alerts sent directly to you when system issues are detected
- Alerts simultaneously sent to our maintenance team for immediate assessment
- Remote diagnosis and resolution where possible
- 24-48 hour response time to all monitoring alerts

Fixed-Rate Remedial Works

- Transparent, fixed day-rate pricing for any required repairs
- No surprise costs or hidden charges
- All work outside of our workmanship warranty covered
- Professional repairs using genuine components

The Benefits of Annual O&M

- Ensure Maximum Performance
- Verify your asset is performing to 100% of its potential
- Proactive Issue Identification
- Catch problems before they escalate, reducing potential maintenance costs
- Insurance Compliance
- Meet insurance requirements and maintain coverage validity
- Peace of Mind
- Focus on your core business without needing to monitor the system yourself
- Extended System Lifespan
- Identify factors detrimental to system health early, maximising your investment

How our services work

1. Sign Up
Complete our O&M agreement for transparent, fixed-rate pricing

2. Monitoring Setup
We configure automatic email alerts to both you and our maintenance team (if your PV system is optimised and allows for reporting)

3. Annual Audit
Professional site inspection with comprehensive reporting (first audit begins one year after installation)

4. Ongoing Support
24-48 hour response to any alerts, with remote diagnosis and resolution where possible

Professional Expertise You Can Trust

SolarEdge Integration

As one of only five Partners for SolarEdge in the UK, Your Eco brings unrivalled expertise and technical credibility to every project. While SolarEdge's advanced online monitoring platform offers clients exceptional system visibility and the ability to self-manage performance, our professional Operations & Maintenance service provides an essential extra layer of reassurance.

Rather than relying solely on the app where unexpected drops in generation or blacked-out modules can go unnoticed until it's too late our proactive inspections and technical support ensure any issues are swiftly identified and resolved, maximising uptime and long-term returns.

YOUR ECO

Certified Excellence

- MCS Certified contractors
- SolarEdge Premium Installer (one of only 5 in the UK)
- ISO 9001, 14001, and 45001 certified
- Zero health & safety incidents in the past 12 months
- 30MW+ of systems under management

Getting Started

- Simple Setup Process
- Sign our O&M agreement today
- Monitoring alerts begin immediately
- First annual audit scheduled for one year after installation
- Fixed-rate pricing for any required remedial works

No Upfront Costs

For newly installed systems, payment begins with your first annual audit

Don't Leave Your Investment to Chance

Picture this scenario: you're expecting peak summer generation, but unknown to you, your system has been operating at reduced capacity for months. By the time you notice, you've lost thousands in potential savings during the highest-yield period of the year.

Our O&M service prevents exactly this situation, ensuring your investment delivers the returns you planned for year after year.
